Dr. Lauren R. Donaldson, Director  
Applied Fisheries Laboratory  
University of Washington  
Seattle, Washington

Dear Lauren:

Dr. Bugher reported that he had a very interesting and pleasant visit with you and members of your staff. He also mentioned that you had said that you saw fourteen head of dead sheep near one of Kermit Larson's camps prior to Shot # 2. I would appreciate it if you would give me as much precise information as you can regarding these sheep. I would like to know the date you saw them and how long you would estimate they had been dead, the location of the camp or other means of identifying it, and such additional information as you may recall regarding the animals.

Sincerely yours,
